ACKNOWLEDGMENT

This report was prepared in the Governments Division by the Finance Branch, headed by **Henry S. Wulf**, under the direction of **Vance Kane**, Assistant Division Chief for Economic Statistics. Assembly and review of data were done by **David F. Patching. Helen T. Anderson** assisted with the manual processing.

Linda Humphreys performed the computer operations under the supervision of **Judith H. Jennings**, Chief of the Computer Utilization Branch.

The Publication Services Division provided advice and service in the presentation of copy for publication. Publication copy was prepared by **Esther Fogwell** and **Ruth Samuels** under the supervision of **Corrine W. Davis** in the Governments Division.

Grateful acknowledgment is made of the cooperation of the numerous State and local officials who kindly provided information needed for this report.

For information regarding data in this report, contact **Vance Kane**, Governments Division, Bureau of the Census, Washington, D.C. 20233 (area code 301/763-7664).

INTRODUCTION

The U.S. Census Bureau conducts an Annual Survey of Government Finances as authorized by law under Title 13, United States Code, Section 182. The 1984 survey, similar to other annual surveys and Census of Governments conducted for many years, covers the entire range of governmental finance activities—revenue, expenditure, debt, and assets.

The 1984 Governmental Finance Series (Series GF 84) contains 8 parts: No. 1, *State Government Tax Collections in 1984;* No. 2, *Finances of Employee-Retirement Systems of State and Local Governments in 1983-84;* No. 3, *State Government Finances in 1984;* No. 4, *City Government Finances in 1983-84;* No. 5, *Governmental Finances in 1983-84;* No. 6, *Local Government Finances in Major County Areas: 1983-84;* No. 8, *County Government Finances in 1983-84;* and No. 10, *Finances of Public School Systems in 1983-84.*

This report provides statistics on State and local government employee retirement system finances. The tables present data on the revenues, benefit payments, cash and security holdings, and membership of these employee retirement systems. Totals are available for the Nation, for States, and for the largest individual employee retirement systems.

ORGANIZATION OF THIS REPORT

This introductory text describes the scope and major findings of the Census Bureau's 1984 government employee retirement system survey, as well as the sources and limitations of the data.

Tables 1 and 2 display national totals of employee retirement system finances along with some historical information for comparative purposes. State financial aggregates appear in table 3. Summary membership and monthly benefit payment data can be found in tables 4 and 5, with the comparative State amounts in table 6. Table 7 contains individually displayed statistics for each retirement system with a membership of 200 or more members.

SCOPE

This report covers only those retirement systems which are sponsored by a recognized unit of government as defined by the Bureau of the Census and whose membership is comprised of public employees compensated with public funds. There must

be an identifiable employee retirement fund financed in whole or in part with public contributions. Direct payments to retired or disabled individuals by appropriation of general funds do not constitute a retirement system and are excluded from this report. Payments to a private trustee or insurance carrier which administers the investments and benefit payments are also excluded as not being a government-administered retirement system (see Sources and Limitations of Data).

The findings presented in this publication are based mainly on reports furnished by these systems in response to a mail canvass survey. Each system was asked to report financial data for its fiscal year that ended between July 1, 1983, and June 30, 1984, and figures on system membership and benefit operations covering the last month of the fiscal year.

For this survey of retirement systems, like those taken in the previous surveys, information was sought separately for two classes of members: (1) "Active members," consisting of covered persons currently employed by State and local governments; and (2) "Other (inactive) members," consisting of employees on military or other extended leave, as well as former employees who had acquired a vested right to receive retirement benefits at a subsequent time. Beneficiaries were not counted as members. Comparative national totals concerning State and local government retirement systems in 1981-82, 1982-83, and 1983-84 are shown in table A.[1]

FINDINGS

Total State and local government employee retirement system revenues for fiscal year 1983-84 amounted to $62.1 billion while their payments totalled $22.7 billion. In the last month of their 1983-84 fiscal year, these government agencies: had a total membership of 11.5 million persons; had amassed financial assets totalling $323.5 billion; paid recurrent benefits of $1.6 billion to 3.3 million persons for an average monthly payment of $488 per beneficiary.

ADMINISTERING GOVERNMENTS

Retirement systems administered by State governments in 1984 accounted for 87.2 percent of the membership, 79.0 percent of the financial assets, and 73.2 percent of all the recurrent benefit payments for State- and locally administered systems. There are 202 State-administered systems and 2,379 locally administered systems. Eighty-two percent (1,945) of the locally administered retirement systems are maintained by municipalities, and most of the remainder are associated with county and township governments. The State-versus-local distinction that applies here pertains to responsibility for retirement system administration, rather than to employee coverage. Many of the State-operated systems cover employees of local governments rather than, or in addition to, covering personnel of the State government itself.

[1]The publications providing prior period data in this report are cited in the text discussion of "Sources and Limitations of Data."

FINANCES OF RETIREMENT SYSTEMS

Table 2 shows that in fiscal 1983-84 State governments contributed $10.7 billion and the local governments provided $13.9 billion to finance employee-retirement systems. Employees contributed $8.8 billion during the year, or about 36 percent as much as total government contributions ($24.6 billion). Earnings on investments of the retirement systems totalled $28.6 billion, up from $26.3 billion in fiscal 1982-83. Combined receipts from all sources add up to $62.1 billion.

Benefit payments during fiscal 1983-84 totalled $19.8 billion, an 13.3 percent increase over the 1982-83 amount of $17.5 billion. This was equal to $6,051 annually for each of the 3.3 million beneficiaries receiving continual (periodic) payments reported as of the end of fiscal 1983-84.

"Withdrawals," as reported in table 3, amounted to $2.5 billion during fiscal 1983-84. This mainly represents the return, to members leaving the systems before retirement, of their contributions, accrued interest, plus in some instances a portion of employer contributions.

The $391 million of "Other payments" reported in table 3 covers direct administrative costs and related incidental payments, as reported by the systems. For numerous systems, all or most administrative expenses are met directly by the government involved, so that such costs commonly are not reported on the census schedules that apply specifically to the retirement systems as such. In Census Bureau reporting on governmental finances, all administrative costs of retirement systems are treated as a general expenditure of the administering government, and only benefits and withdrawals paid by the systems are distinctively reported as "employee retirement expenditure."

Receipts of State-administered systems amounted to $48.7 billion in fiscal year 1983-84, as shown in table 3. Of this amount employee contributions totalled $7.3 billion. Government contributions totalled $18.5 billion, of which $10.5 billion was transferred by State governments to their own retirement systems and $8.1 billion was paid by local governments to State systems to cover local member costs. Earnings on invested assets of the State systems amounted to $22.9 billion. Investment earnings include any realized profits on investment transactions, plus any net gains on investments sold, if recorded as receipts of the system.

For Census Bureau reporting on governmental finances, contributions by a particular government to an employee-retirement system it administers represent intragovernmental transactions. These amounts are netted out in arriving at a nonduplicative total of the government's revenue. Accordingly, the "employee retirement revenue" of State governments in fiscal 1983-84 amounted to $38.3 billion—i.e., the sum of all retirement system receipts except the $10.5 billion in contributions by the State governments themselves.

Of the $13.4 billion total local retirement systems revenue in fiscal year 1983-84, employee contributions were $1.5 billion. Government contributions totalled $6.1 billion, $5.9 billion of which was contributed by the local governments. Earnings on investments of the local systems amounted to $5.7 billion.

Cash and security holdings of all employee retirement systems amounted to $323.5 billion in fiscal 1983-84 as compared to $289.7 billion in fiscal 1982-83. Cash and security holdings of State-administered systems rose from $229.7 billion in fiscal 1982-83 to $255.7 billion in fiscal 1983-84, and holdings of locally administered systems rose from $60.0 billion to $67.8 billion during the same period. As a percent of total holdings, State retirement systems held slightly less than 80 percent and local retirement systems slightly more than 20 percent in both fiscal years 1982-83 and 1983-84.

As shown in table 2 and text table B, investments in nongovernmental securities made up 69.0 percent of the total assets of these systems at the end of fiscal 1983-84, compared with 72.1 percent in 1982-83. Corporate stock holdings have increased 15.9 percent since 1982-83 and now comprise 25.2 percent of retirement system assets. The proportion of assets invested in corporate bonds decreased from 27.2 percent in 1982-83 to 23.1 percent in 1983-84. The proportion of financial assets represented by Federal Government securities has increased from 24.0 percent in 1982-83 to 26.4 percent in 1983-84. Retirement system investments in real property totalled $3.2 billion at the end of fiscal 1983-84. Of that amount, $542 million, or 17.2 percent, was held by locally administered systems.

MEMBERSHIP SIZE

Total membership of the retirement systems covered by this report was 11.5 million in 1983-84, showing a slight increase from the prior year. About 95 percent of all the persons participating in retirement systems of State and local governments belong to one of the 169 largest systems—those reporting a membership of 5,000 or more. At the other extreme, as shown in table 5, 66.6 percent of the total number of employee retirement plans of State and local governments had fewer than 100 members enrolled at the end of fiscal 1983-84. These small systems accounted for less than one-half of 1 percent of the total membership of all public employee retirement systems. These proportions generally resemble those reported for the prior year, reflecting a continuation of the predominant role of large-membership systems, as well as the existence of numerous very small systems.

A membership-size distribution of all systems, by States, is presented in table 5, and figures for each individual system having 200 or more members appear in table 7. The six largest systems—one each in California and New York with more than 500,000 members, one each in Florida and Texas with more than 400,000 members, and one in Ohio with more than 300,000 members--accounted for about 20 percent of the total membership of all systems.

Total State-by-State membership of all public employee retirement systems ranged from over 1.1 million in California to about 18.5 thousand in Vermont.

BENEFIT OPERATIONS

National totals on benefit operations of employee retirement systems covering the last month of each system's fiscal 1983-84 are presented in table 4. Benefit items reported exclude amounts that represent borrowing by members or withdrawals of contributions by members leaving the system before retirement.

Table B. Holdings of State and Local Government Employee-Retirement Systems: Fiscal Years 1982-83 and 1983-84

Item	Amount (billions of dollars)		Percent of total

Total periodic (continual) benefits for the month were $1.6 billion. Payments by State-administered systems accounted for 73.2 percent of the total, similar as for the corresponding period in 1982-83. However, the average payment of $617 per beneficiary by the local systems continued to be larger than the $453 paid by State systems. In fiscal year 1982-83 beneficiaries of local systems received an average payment of $586 compared with an average of $430 per beneficiary of State systems. Summary figures on recurrent benefit payments are shown in table C.

Of the 3.3 million persons receiving monthly benefit payments in 1983-84, 86.4 percent (2.8 million) were persons retired because of age or length of service. About 203,392, or 6.2 percent, were persons retired on account of disability. The other 241,474 beneficiaries (7.4 percent) were the survivors of former system members. Table D shows the distribution of beneficiaries and monthly payments in terms of these three benefit classes.

RELATION TO FEDERAL SOCIAL SECURITY (OASDHI)

Before 1951, public employees were not eligible to participate in the Federal Social Security program (Old Age, Survivors, Disability, and Health Insurance—i.e., OASDHI). Since then, however, a number of amendments to the Social Security Act have made social security coverage available under certain conditions to State and local government employees, including those who also participate in retirement systems of these governments. The applicable conditions of the law make it possible for social security coverage to apply to all members of such a retirement system or to only a portion of its membership.

Accordingly, in this survey each retirement system was asked to indicate the relationship of its coverage of its active membership to that of the Federal program by reporting whether all of its active members, some but not all, or none of its active

Table C. Summary of State and Local Government Employee-Retirement System Periodic Benefit Operations: Fiscal Years 1981-82, 1982-83, and 1983-84

members were covered by the social security system as of the end of the retirement system's 1983-84 fiscal year. Findings from this inquiry are reported by individual major systems shown in table 7.

SOURCES AND LIMITATIONS OF DATA

The same criteria developed for the 1982 Census of Governments retirement survey for inclusion of certain types of retirement systems were followed in the 1984 survey. Only those systems administered by the sponsoring State or local government, and subject to auditing controls of that government, are included in this survey. Retirement funds found to meet one or more of the following conditions were excluded from the survey: (1) All retirement contributions are forwarded as premiums for purchase of annuity policies from private insurance carriers; (2) the Teachers' Insurance and Annuity Association (TIAA) provides all public employee retirement coverage, without any supplemental coverage administered by the government; (3) all retirement benefits are paid directly from annually appropriated general funds.

Information for this report was obtained mainly by mail surveys covering all State-administered systems, all local systems having a total membership of 50 or greater, and additional local systems associated with cities having a population of 50,000 or greater and counties having a population of 100,000 or greater. Data from the 1982 Census of Governments were used in lieu of annual canvassing for relatively minor city-administered systems—i.e., those systems operated by cities of under 50,000 population which had fewer than 50 members in 1982.

Of the approximately 1,010 survey questionnaires mailed out, about 950 usable data responses were received. About 60 systems did not respond despite extensive followup correspondence and telephone calls. The active membership of virtually all nonresponding systems was, according to available records, less than 200 employees. The file was systematically completed by using the most recent fiscal year available in census records.

All responses were examined for reasonableness and internal consistency. Followup correspondence and telephone calls were used extensively to clear up instances of apparently incomplete or erroneous reporting.

Survey questionnaires called for two types of detail that apparently could not be accurately and consistently reported in all cases. One of these was the requested distinction between the active members and other members of retirement systems. In some instances, the reported number of active members may include some system members who should not have been so counted. Information on the number of "Other" members apparently could not be developed on a consistent basis from available records by a number of systems. The other problem concerns the requested breakdown of recurrent beneficiaries and payment amounts according to the type of benefit involved. It seems likely that the predominant class (benefits to persons retired on account of age or length of service) includes some amounts that, with more refined basic record systems, would have been reported under one of the two other defined classes of recurrent benefits and beneficiaries (disability retirees or survivors). These problems are not limited to the 1983-84 data, but similarly affect retirement system figures from prior census surveys.

Prior year statistics that appear in the report are from various Census Bureau publications, as follows: Data for 1978-79 through 1981-82, annual reports entitled *Finances of Employee-Retirement Systems of State and Local Governments in (year);* and data for 1981-82, *Employee-Retirement Systems of State and Local Governments* (Vol. VI, No. 1 of the 1982 Census of Governments). For the census year 1981-82, the survey is designed to cover all retirement systems of State and local governments, and gather data not only on the finances of such systems but other characteristics also—membership, coverage, and benefit operations. For other years, the cited sources supply only data based on a sample survey rather than a comprehensive enumeration.

Note: Because of rounding, detail may not add to totals. A number of State and local retirement systems did not provide sufficient benefit operations detail. The amounts for these systems were counted under "Persons retired on account of age or length of service."

- Represents zero or rounds to zero.
NA Not available.
[1]Receipts from Federal Government.
[2]Consolidated investment account for all retirement funds administered by indicated government.
[3]Data are for fiscal year 1982-83.
[4]Data are for fiscal year 1978-79.
[5]Included with Kansas Public Employees Retirement System, above.
[6]Data are for fiscal year 1981-82.
[7]Data are for fiscal year 1979-80.
[8]Data reflect final adjustment made before publication. Not carried forward in summary tables.
